# Ecovolve Electric Dumper - 1Tonne - High Tip

The E1000 Electric Dumper from Ecovolve is a versatile new machine, capable of operating both indoors and out.

At less than a meter wide and with a turning circle of just 1.65 meters, the E1000 has been designed with tight spaces in mind.

Its battery pack will provide power for a typical working day on just a 7-hour charge.

The E1000 is perfect for use where operating levels must be low while the compact size and turning circle means the E1000 can go where others can't.
