

TL Transporter for hospitalbeds

TL Bed-transporter is produced with either one or two suspended truck seats.
The vehicle has a steering wheel and a forward/reverse contact near the steering wheel.

Driving unit: motor 24 volt, 1,2 kW AC and a magnetic brake in the middle of the vehicle.
It has 2 suspended support wheels and 2 semi-solid wheels beneath the platform.
Alternative: boogie truck rolls.

Battery: 24 volt, 160 ahp, gel.
Charger: 24volt, 20 ahp, fully automated

The platform is being lowered and raised by an actuator via contacts near the driving seat.
