Advantages and special features

These battery powered radial brushes MAR 800 Charger and WR 900 Charger are very easily to handle and have a nearly silent mode of operation. Equipped with a large battery and a powerful DC motor they are perfect for cleaning up large courtyard areas and dirty passages. These professional machines of the 800er and 900er series don't differ in their working width but only in the height of the brush container. The higher the brush container the larger volumed dirt can be moved.

You will find the video of MAR 800 charger + WR 900 charger right here!

Special equipment

- water-spraying equipment for dust control
- narrow wheels 16 x 6,5-6 4PRTT for a broader ground pad of tyres
- broad roller feeler for a broader ground pad of guide wheel
